CES 2018: Foresight shows vision system for semi-autonomous and autonomous vehicles

22-Jan-2018 09:08 GMT

The system features accurate image-processing algorithms and sensor fusion for superior detection

Israel-based automotive vision systems specialist Foresight Autonomous Holdings showcased its new 'QuadSight' vision system designed for semi-autonomous and autonomous vehicles at the 2018 CES in Las Vegas, United States earlier this month.
